

SET UP WEBMAIL through Mozilla Thunderbird

- 1 Visit thunderbird.net; download and install the free email application. Open the program, and you'll be prompted to set up your email.
- 2 Enter your name, full email address and password, then click Configure manually...
- 3 Enter the settings for IMAP Incoming and SMTP Outgoing Servers and Ports as pictured. Confirm the Usernames are pre-filled. Click Done.
- 4 If you plan to use FireFox as your default mail application, click Set as Default. If not, click Skip Integration.
